INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No. PCT/GB98/02807

I. Basis of the report

1. This report has been drawn on the basis of (*substitute sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to the report since they do not contain amendments.*):

Description, pages:

1-15 as originally filed

Claims, No.:

1-11 as originally filed

Drawings, sheets:

1/15-15/15 as originally filed

2. The amendments have resulted in the cancellation of:

- ☐ the description, pages:
- ☐ the claims, Nos.:
- ☐ the drawings, sheets:

3. ☐ This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed (Rule 70.2(c)):

4. Additional observations, if necessary:

VII. Certain defects in the international application

The following defects in the form or contents of the international application have been noted:

see separate sheet

VIII. Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:

see separate sheet

The following document is cited in the International Preliminary Examination Report:

D1 = BALDWIN J H ET AL: "AAL-2 - A NEW ATM ADAPTION LAYER FOR SMALL PACKET ENCAPSULATION AND MULTIPLEXING" BELL LABS TECHNICAL JOURNAL, vol. 2, no. 2, 21 March 1997, pages 111-131, XP000695171

V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Document D1 (abstract; page 116, left column, lines 19-23; page 118, lines 9-13 and 29-32; Fig. 4) discloses according to all the features of present claim 1 a method of transporting point to point protocol traffic by encapsulating it in AAL2 minicells that are then transported in a single ATM virtual channel.

As a consequence, the subject-matter of claim 1 is not novel and claim 1 does not meet the requirements of Article 33 (2) PCT.

2. In this connection, it is pointed out that even if the Applicant were to slightly modify claim 1 or to interpret it in such a manner as to enable him to allege that its subject-matter is novel, said claim would not comply with the dispositions laid down in Article 33 (3) PCT for lack of inventive step. Document D1, in fact, discloses the same object and the same type of solution as the present application.
3. The subject-matter of independent claim 11 corresponding to that of claim 1 in terms of apparatus features, the same objections raised under Article 33 PCT in respect of the latter claim also hold for independent claim 11 which, consequently, does not meet the requirements of Article 33 PCT either.
4. The additional features introduced by dependent claims 2-4,6 are also known from D1 (see respectively page 118, left column, lines 29-32; page 117, right column, lines 6-8; Fig. 2, description of the ATM cell; Fig. 5, Fig. 6).

**INTERNATIONAL PRELIMINARY
EXAMINATION REPORT - SEPARATE SHEET**

International application No. PCT/GB98/02807

Dependent claims 2-4,6, therefore, do not meet the requirements of Article 33(2) PCT.

Also, the supplementary features specified by dependent claims 5, 7-10 do not add anything of inventive significance to the subject-matter of claim 1 as they merely refer to various implementation details which fall within the competence of the skilled person.

As a consequence, dependent claims 5, 7-10 do not meet the requirements of Article 33 (3) PCT.

VII Certain defects in the international application

The claims are not in the two-part form recommended by Rule 6.3(b) PCT and do not include reference signs in parentheses as required by Rule 6.2(b) PCT. Moreover, document D1, which appears to represent the most relevant prior art, is not acknowledged in the description (Rule 5.1 (a)(ii) PCT).

VIII. Certain observations in the international application (clarity)

The feature set out in claim 6 that "the PPP traffic comprises the ATM packet payload" is claimed twice when claim 5 is dependent on claim 4, which results in a lack of clarity against the dispositions laid down in Article 6 PCT.

(54) Title: TRANSPORTING MULTIPROTOCOL DATAGRAMS

(57) Abstract

Point to point protocol (PPP) traffic is transported over an asynchronous transport link by encapsulating the traffic in AAL2 minicells and transporting the minicells in a single virtual circuit. Minicells from a number of users can be multiplexed in the same virtual circuit.
